

# Caribbean Infrastructure Conference

## REGISTRATION FORM

The Jamaica Institution of Engineers

### Developing Sustainable Infrastructure

A two-day conference highlighting the role and importance of engineering in sustainable development across the Caribbean. The design, development and maintenance of our infrastructure is paramount given the uniqueness of the Caribbean in its susceptibility to a range of natural disasters including hurricanes, earthquakes, volcanic activity and storm surges. The deleterious effects of such natural phenomena are compounded by the influence of climate change. This conference represents a gathering of the engineering and related technical expertise necessary for guiding us in Developing Sustainable Infrastructure.
